

BOARDS. FLOORS. IDEAS.

Press-release Kaindl BOARDS collection 2025

## Created from the richness of nature: The Kaindl BOARDS collection 2025 provides a vision of the extraordinary

Kaindl has always been the leading innovator for the furniture industry and interior design. With the will to always be one step ahead, the company continuously develops pioneering concepts that inspire the industry time and time again. The new BOARDS collection 2025 continues this trend and redefines innovation in the furniture industry. With four innovative material categories, it offers an infinite variety of design options and makes it possible to create unique room concepts

### **New benchmarks in terms of aesthetics and functionality**

Kaindl constantly succeeds in reinterpreting the familiar and placing everyday materials in a surprising context. The BOARDS collection 2025 is impressive proof that Kaindl continues to set standards in terms of design and functionality. The focus is on the highest product quality and innovative designs. The diverse formats and surfaces are also impressive.

Four appealing and highly varied BOARDS product ranges are waiting to be discovered - COLOURline, ARTline, WOODline and REALwood.

COLOURline stands for color and variety. An endless variety of plain decors, from timeless classics to the hottest trend colors. The highlight here: the Kaindl anti-fingerprint decors. Available as OPTIBOARD composite board with glued top layer laminate, layer laminate and additionally the highly resistant KAINDL anti-fingerprint surface is available as OPTI FACED BOARD in direct coating in the format 2800x2070x19 mm in 10 trendy colors. Like the composite board, OPTI FACED has a high-quality MDF core board.

ARTline brings together materials from all over the world that are inspired by nature. ConcreteART picks up on the urban charm of concrete and minerals, while MetallART is dedicated to the beauty of iron, copper and other metals. The FabricART is the product group that creates a grandiose wow effect with its tactile and elegant fabric structures. And finally StoneART, which showcases the look of stone and rock and creates brilliant accents in sophisticated interiors. Particularly noteworthy is the Travertine stone decor in three soft earth tones that emphasize the natural beauty of the stone. The "Ceramic Nature-CN" structure gives the decors a particularly authentic look.

BOARDS. FLOORS. IDEAS.

The WOODline Natural & Classic product range, on the other hand, shines in harmonious, warm natural tones and its richness of detail makes these decors an eye-catcher. Here too, nature shows itself in all its abundance, each decor is a visual and tactile experience. The Cremona oak is an absolute highlight. The decor pattern impresses with its sophisticated play of colors and the perfectly synchronized surface. The four color combinations Cotta, Torro, Cannolo and Tartufo set new color trends and perfectly round off the successful appearance of the decor.

Another new innovation from the Kaindl decor family is making a name for itself with its elegance and simplicity: Aviva oak. A special synchronous structure was developed for this decor, to which the five vibrant new colors perfectly match. Its harmonious appearance is particularly attractive in combination with many trendy plain colours from the COLOURline.

KAINDL once again demonstrates its innovative strength with its all-over surfaces for the WOODline Classic. “Authentic Xpressive” is the name of the new texture, which not only highlights the elegant Summerfield oak decor in a balanced way.

KAINDL picks up on the omnipresent trend of “grooved fronts” in the solid wood and veneer sector with the cleverly composed Oak Relief decor. The “groove” surface perfectly emphasizes the lines in the decor.

### **Nature at it's best.**

As authentic as nature itself. The REALwood product range combines original wood veneer with high-quality processing to bring out the diverse spectrum of modern natural wood panels. The basis is a large selection of core boards in combination with the 28 different veneers from the OAK, SOFT and HARDwood collections. The results are high-quality architectural and design objects that remain true to their natural origins and contribute to a positive indoor climate.

### **Responsibility starts right in the forest**

KAINDL products are ecologically valuable, conserve resources and offer a high degree of freedom in design and processing. Wood is the natural basis of our ideas. We mainly process local woods into high-quality and sustainable products. Our responsibility towards the environment starts right in the forest.
